Pretty interesting to see professional Dota players embrace the competitive scene and dedicate their lives to something that makes them as a person very inspirational.

8/10. It is a fairly simplistic yet well execute TB strategy with 40K Titans. Well worth the asking price even now and I am sure the devs will keep improving the game.. An enjoyable bullet hell game, not unduly hard on the normal setting, with aparodic, self-referencial steampunk setting\plot. The dialogue is outrageously histrionic and hilarious--whomever wrote this has a great command of the English language and 19th C. style. there are eve nods to shoot-em-ups like Zero Wing and Star Castle and some references that I know I'm not getting. Graphics get the job done nicely; there's even a stylishly illustrated intro and ending sequence.

The biggest frustration is the controls, and I'm kind of miffed at the developer for not giving us the option to reassign keys. Space bar is always shoot, and on a lot of laptops, whether you use the arrow keys or WASD, at least one will be on the same circuit as the space bar. In other words, you can simultaneously move up left, you can move up and shoot, and you can move left and shoot, but if you try to move up-left and shoot the keyboard won't acknowledge the last key you pressed. The simple solution would be to use the mouse, only this game's mouse movement feels imprecise, sluggish and then erratic. The best way to play it, then, is use WASD/arrow keys to move and the mouse button for your primary weapon. You'll loose the odd life by accidentally moving the mouse, is the only downside. I imagine playing it with a gamepad would be fine.

This isn't hardcore bullet hell, and if you've played some shmups you'll probably beat the game within one to two hours. Steam and Metal aims for the style and length of old arcade or console shmups, with the intent that you want to periodically replay them. I would say the gameplay is fun enough and the dialogue funny enough that you will. Certainly worth a dollar, and I wouldn't mind seeing a sequel.. is anyone still playing this game. I usually hate rogue-likes. For some reason I 100% love this game. One of the best games ive ever played.

The music is so freaking amazing.

Perfect game for coop.

Very short yet sweet little book. There is no dialogue or music with words. There is instrumental though. It reminds me of my family. I don't have a dad (seperated) and my mom isn't around that often as I would like. I always watch over my little siblings. Make sure they eat and get ready for school. Things like that.. Entertaining and funny at first it becomes boring after 5 minutes of gameplay. Just because whatever you do.... ya die and that's all.

Expected more freedom and exploration.

The style is good. The contents - not so much.

. Loved the fact that it had default controller mappings for mode 1 and 2, like you would use to fly RC planes\drones.

The menu system where you have to look behind you is a bit much, maybe my centre point was off but seemed like I had to turn my head 180degrees to see the track, let me turn my body using the stick or keep menu to 180 degrees or 230degrees max.

The dynamics of how the drones handle are way off....if you've ever flown racing drones before you'll have a hard time adjusting to this. Bank and yank does not work well at all, I ended up doing best by flying rudder and "throttle" (up\down) only, which kinda defeats the point.

Had serious frame drops in menu view, on a 1070?

Fun for 30min. Buggy clunky & basially crap. not worth the 2\$ i got it for. i honestly wish this game was playable, but it isnt..

Cool game in which you need to use the cores to collect all the coins. Went and stuck for 2 hours, definitely recommend..

Whilst this game may not look very.... impressive, playing in-game provides a rather fun experience. It's a casual, easy(ish) to pick up bowling game, with powerups and all.

Different game types - whilst they not vary too much, still provide a nice amount of variety in terms of gameplay.

Where I say ish in terms of the ability to pick it up, the controls at first seem rather wonky, and as my younger cousin says "Can I turn down the mouse?"

After you learn the controls, which aren't really hard to learn at all, it is overall a fun game and worth the buy, although only if you have additional person to play aswell.. **GAME IS FUN AS HELL!** only down side is its dead! 1 server and ther person is not even playing haha.. wish there were other games like this one but very active.. This game was nothing like I was expecting. The first ghost you encounter actually scared the♥♥♥♥♥out of me. The puzzles in this game are actually challenging and engaging unlike most horror games today. The graphics may not be the best but this game is an example of doing horror right. You play as an investigator trying to find 3 missing persons. The investigation brings you to an abandoned factory seems pretty generic but thats where the game surprised me. Once you go down the stairs of the factory♥♥♥♥♥gets real intense. A girl trapped in a room asks for your help so like I said before puzzles and figuring out a combination to a lock but the scene gets really creepy. After that you go down more you guessed it stairs and find yourself in caves. I am not giving away anything else but damn this game got me. I give stairs 5 creepy ♥♥♥♥♥ing ghosts out of 5.. Its a good game but some Hunters are tunneling good runners but its good.
